Three circular images are arranged in a cluster on the right side of the slide. The top-left circle shows a group of people's hands clasped together in a team huddle, overlaid with a futuristic digital interface. The top-right circle shows a hand holding a transparent sphere filled with various blue icons representing technology, security, and business. The bottom-right circle shows a person's hands interacting with a tablet displaying a world map and data charts, with additional digital overlays.

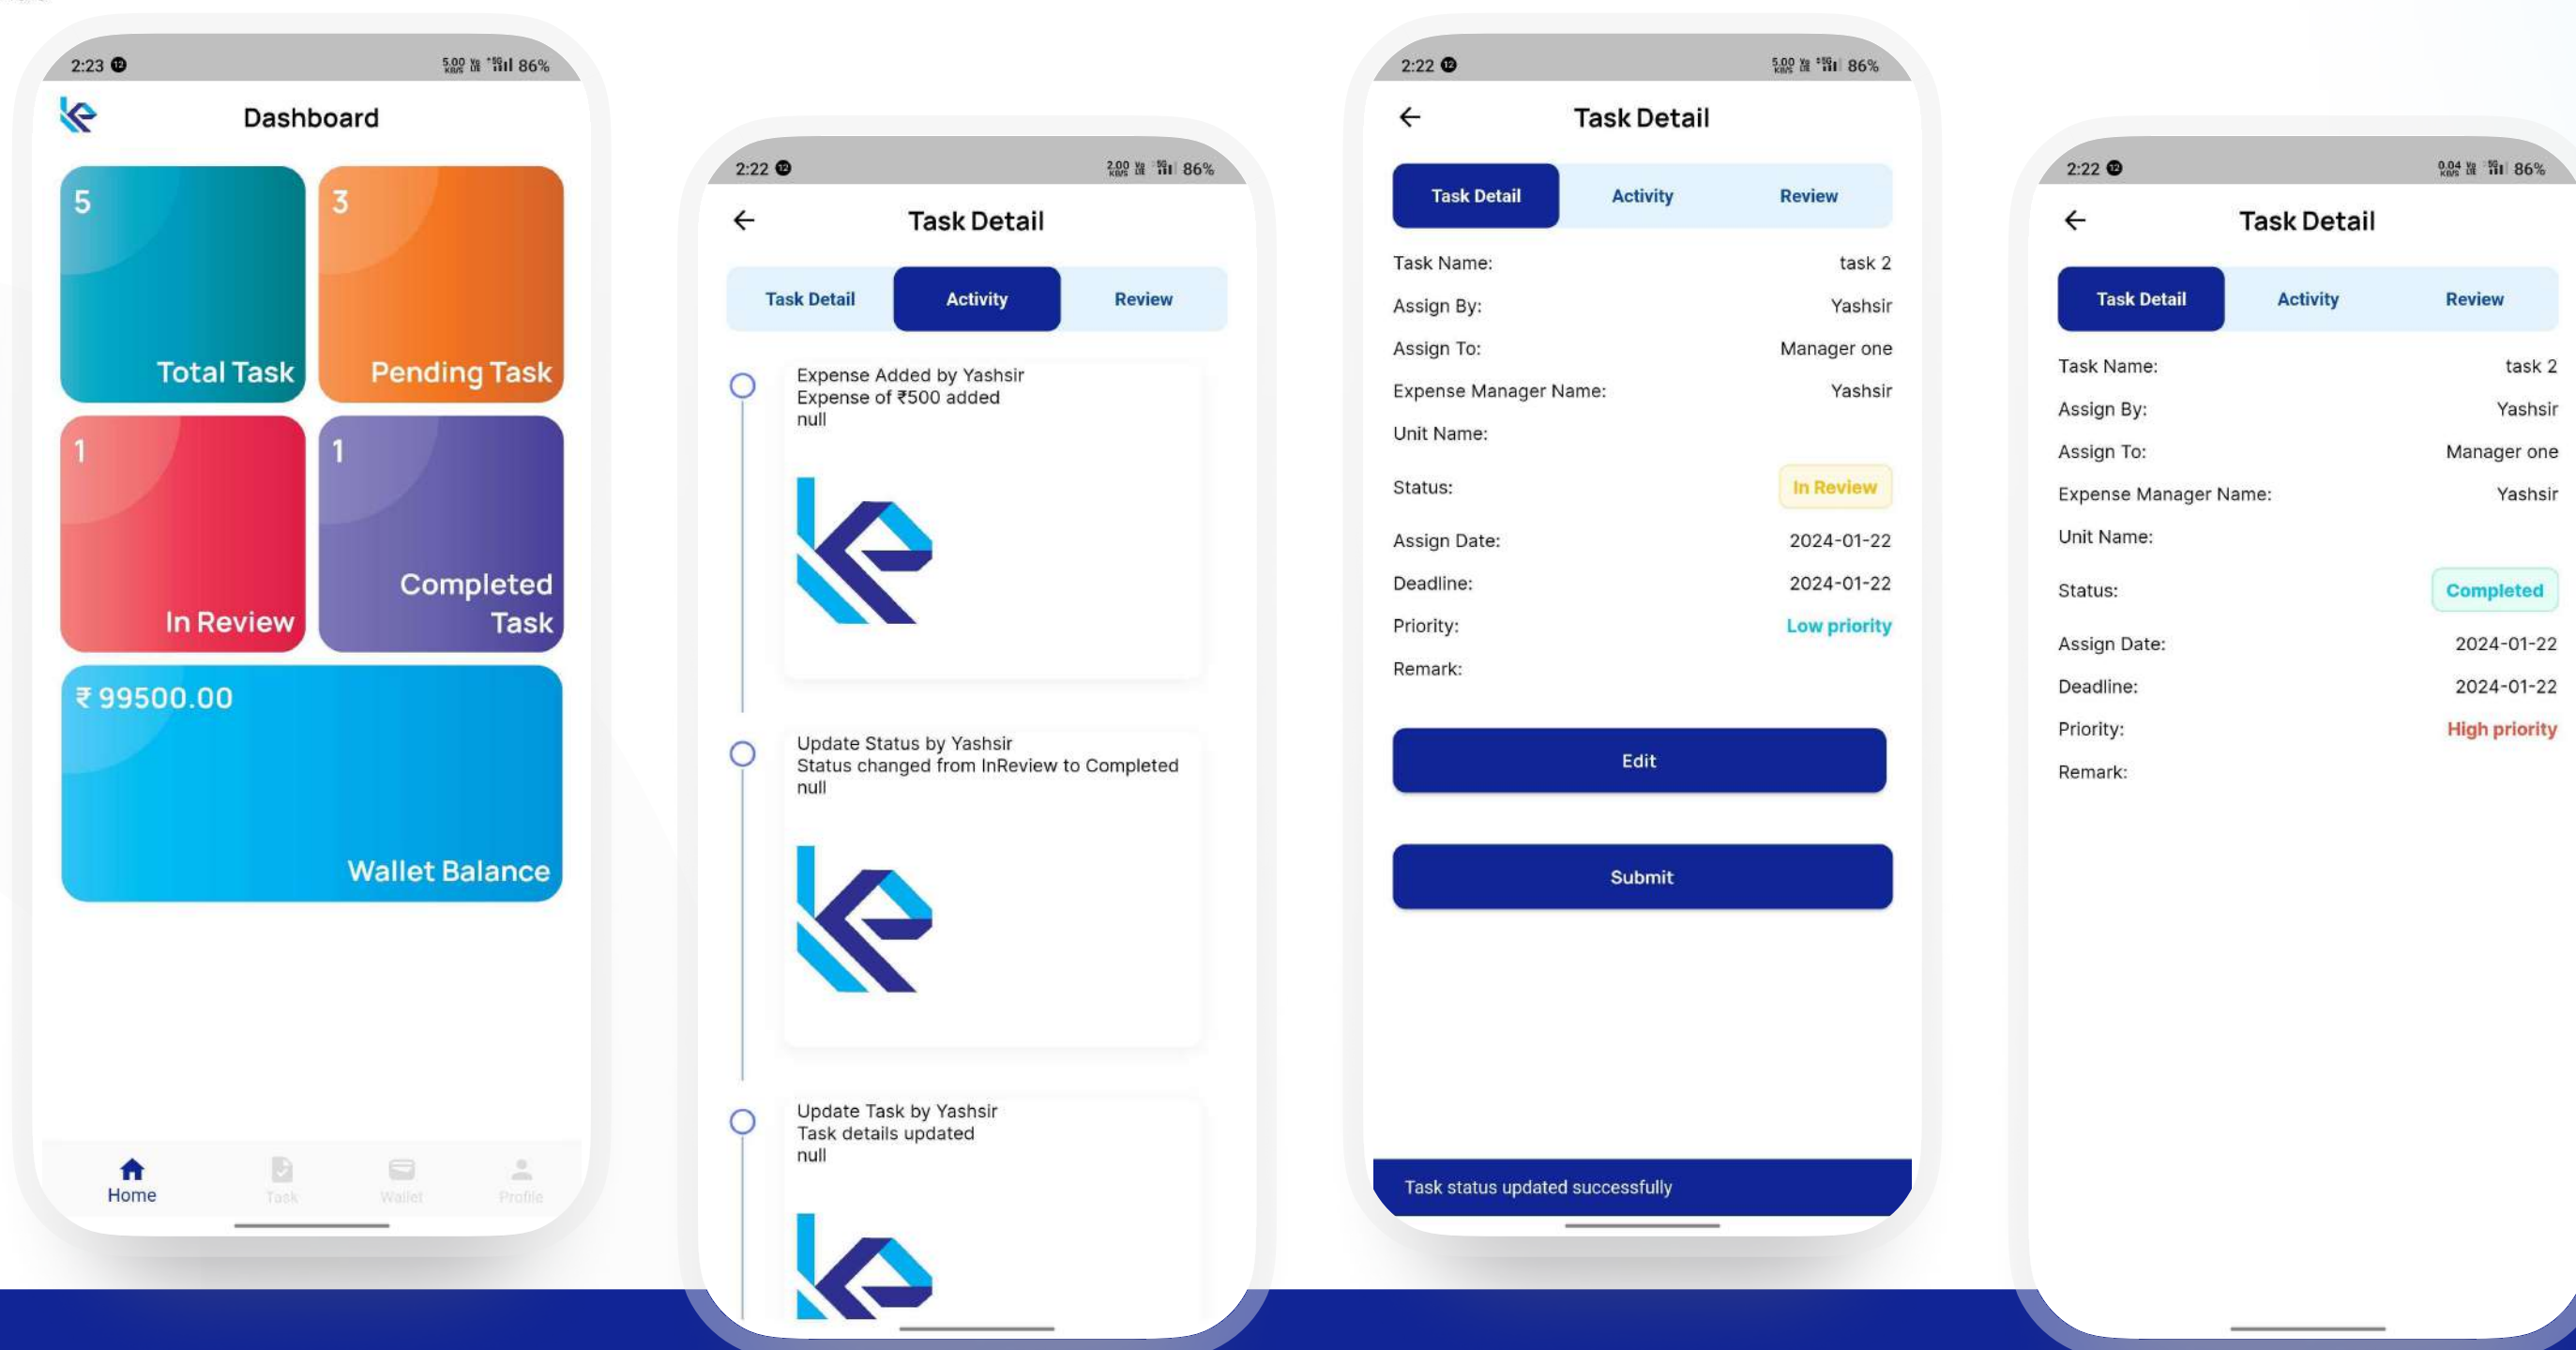

A quick tour of the projects  
We have delivered

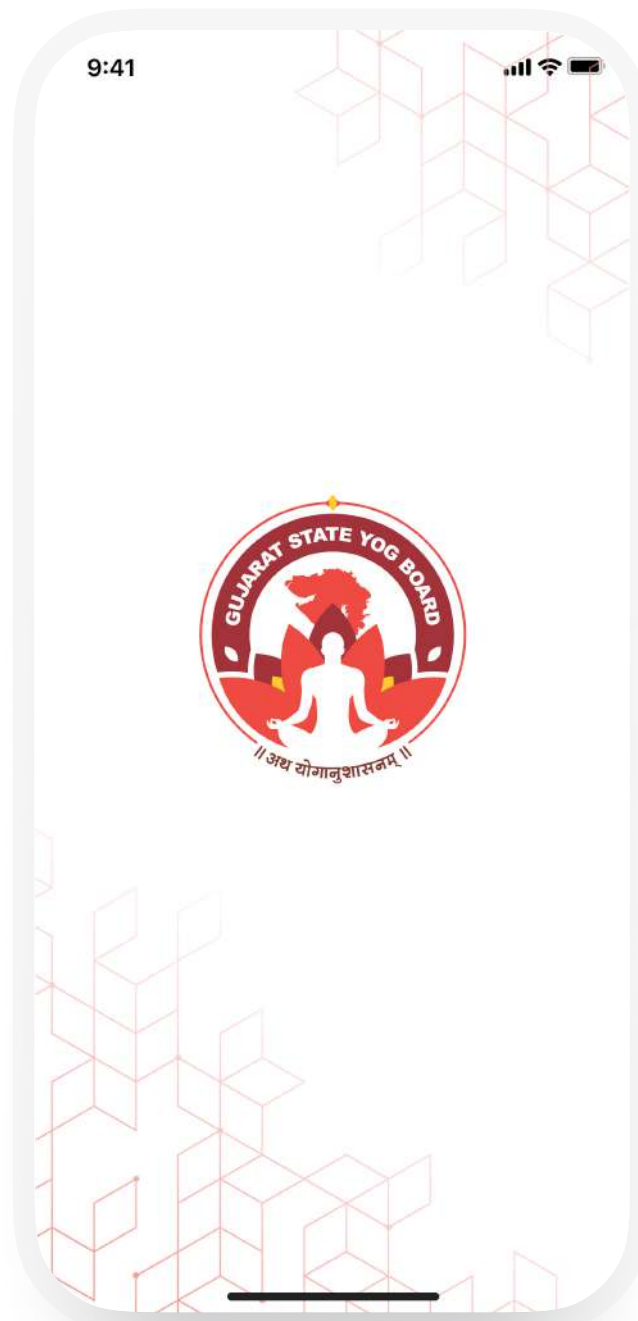

**Idea:** The team aims to enhance engagement on their digital platform to raise awareness about forests.  
**Proposed Concept:** Developed a 3D experiential website featuring immersive sounds and captivating forest views to offer visitors a visually stunning and engaging experience, promoting awareness of forest environments.

**Challenge:** Difficulty in effectively monitoring financial transactions within the organization.

**Solution:** Introduced a comprehensive mobile and web-based task management system equipped with advanced features for efficiently overseeing financial activities. This digital platform empowers individuals and organizations to streamline, prioritize, and visually manage one's daily tasks. Additionally, our application facilitates seamless communication with hierarchical levels through a chat option, reducing delays in approval processes.

**Challenge:** Efficiently organize the directory of yoga centers across the state.

**Solution:** Karbh has designed a mobile application with a user-friendly interface and essential data fields to manage and update the official information for every yoga center across the state. This application enables the government to easily access detailed information about each yoga center.

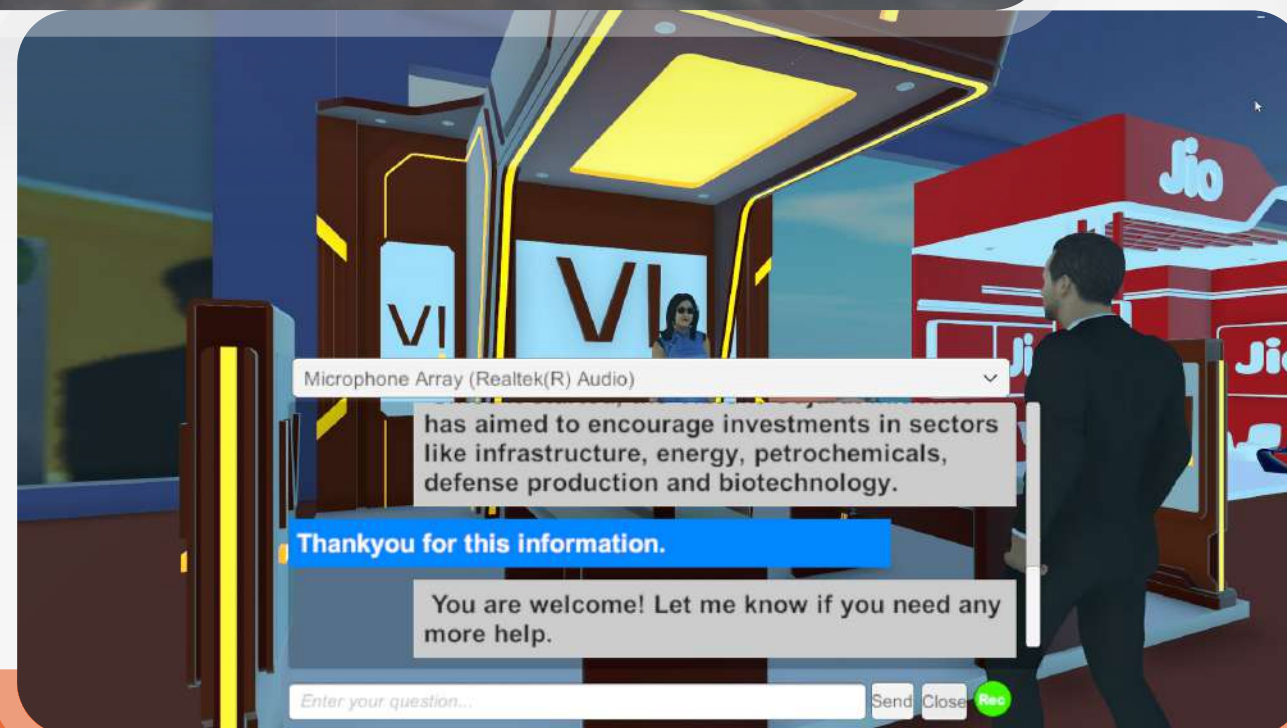

**Idea:** IRCTC officials were keen to explore the potential of a real-time chatbot to elevate customer service through its ability to empower both IVR and human agents to deliver faster and more effective responses.

**Solution:** Inspired by the capabilities of ChatGPT, our team developed an innovative AI-powered chatbot for IRCTC. This multilingual solution allows passengers to ask questions in their preferred language, receiving pre-programmed answers instantly. For more complex inquiries, they can seamlessly connect with a live customer agent directly within the chat interface, ensuring their needs are met efficiently.

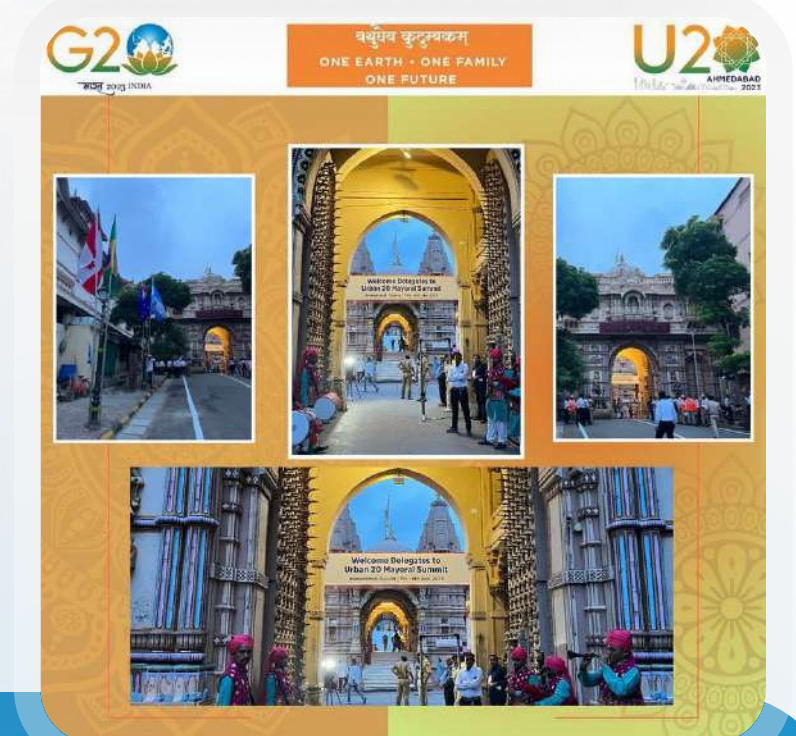

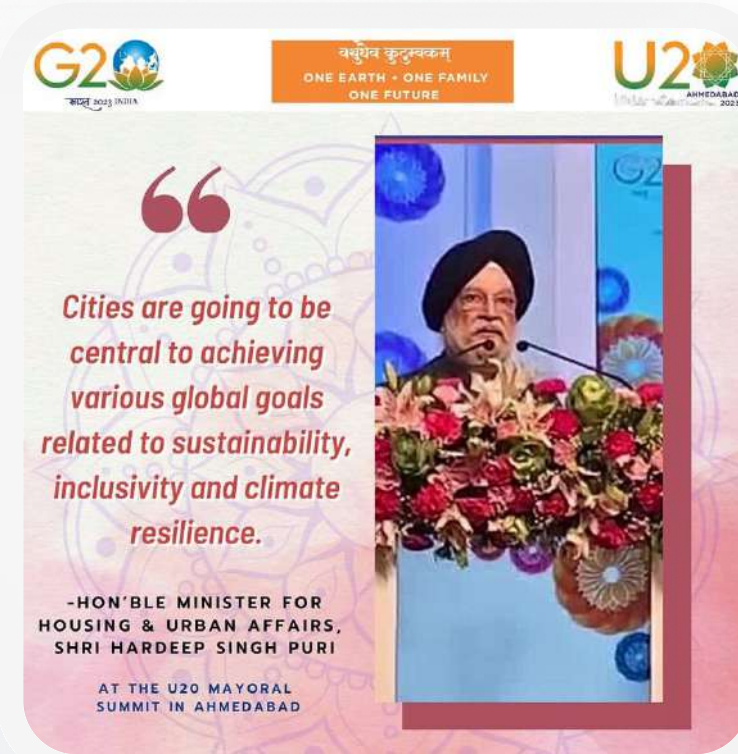

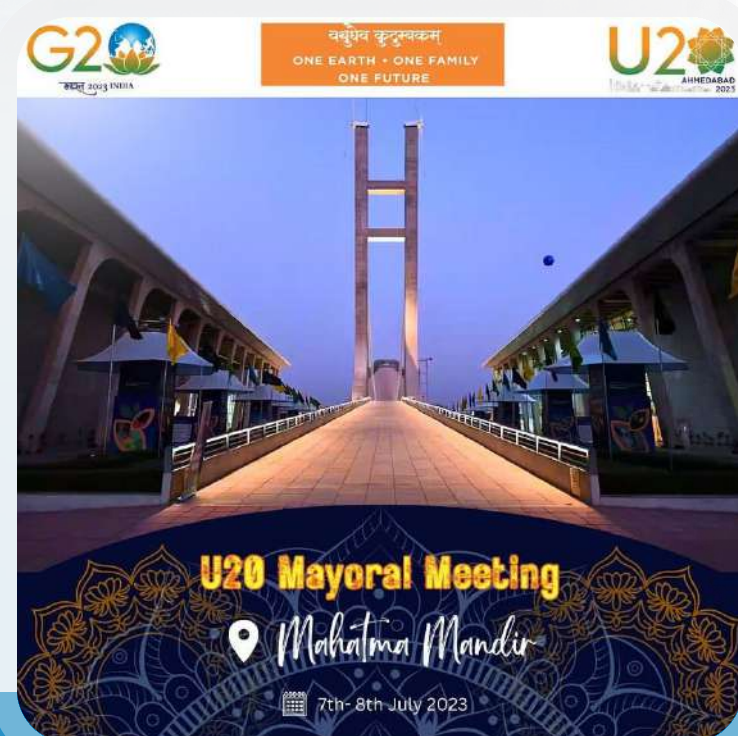

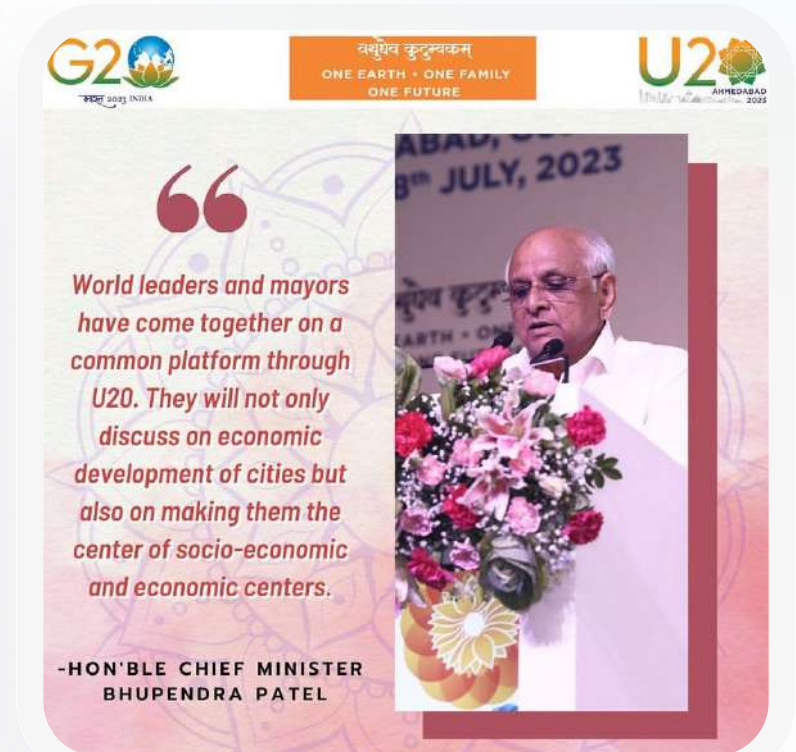

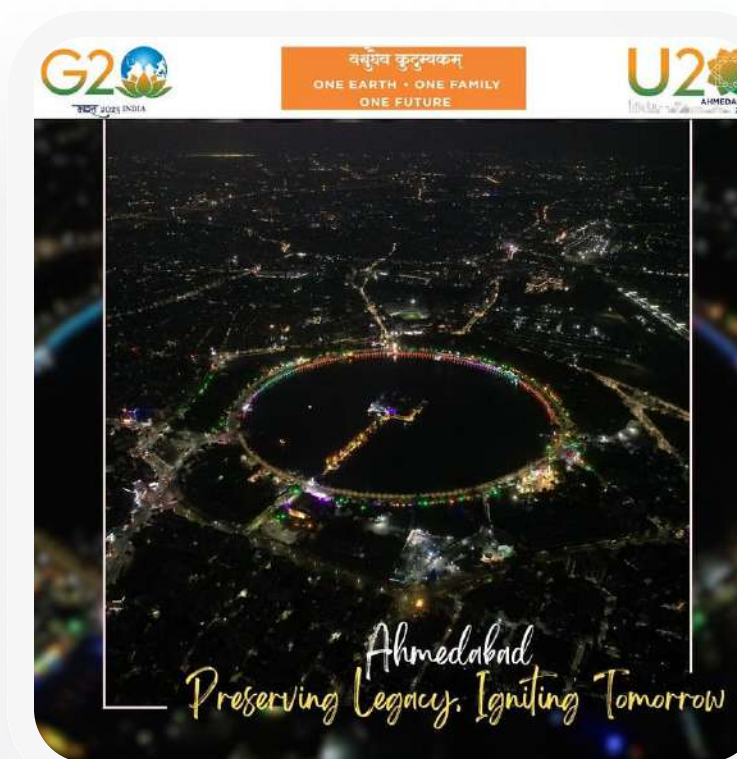

**Idea:** Immerse the audience in the domain of Web 3.0, providing a unique experience through the lens of the METaverse.

**Proposed Concept:** Our team has innovatively developed a metaverse platform that facilitates both information brand interaction, integrated with ChatGPT Bots, and immersive exploration for navigating through an exhibition ground, offering a unique and engaging experience.
